

2CRSI joins the Open Compute Project as a Platinum member

Strasbourg (France), October 8, 2018 at 8:00am - 2CRSI, a manufacturer of very high-performance servers, is today announcing that it has joined the Open Compute Project (OCP) as a Platinum member.

The Open Compute Project (OCP), a global community taking a whole new approach to server design, today offers more effective, more flexible and more scalable solutions. Leading technology companies such as Facebook, Microsoft and Apple are working together to establish new IT infrastructure standards to deliver a broader choice of available products and lower operating costs.

"By joining the Open Compute Project, we are now as closed as possible of the very latest developments in the community and will play a part in developing the OCP's future products", stated Alain Wilmouth, Founder and Chief Executive Officer of 2CRSI. "That puts us in an even stronger position to take our development efforts to the next level for very high-performance infrastructure and to stand out from other market players."

About 2CRSI

Based in Strasbourg, and with subsidiaries in Manchester, Dubai and San Jose at the heart of America's Silicon Valley, 2CRSI specialises in the design and manufacturing of very high-performance computer servers. The Group already has more than 100 customers in 25 countries, to whom it has supplied innovative processing, storage and data transfer solutions. In 2017, the 2CRSI Group had consolidated revenue of €31m, an increase of 169%, with an EBITDA margin rate of 7.3%. It currently employs more than 130 persons.
