

## 2018 revenue multiplied by 2.1 to €65

---

- 2018 consolidated revenue of €65 million, representing growth of +112% vs. 2017
- 2018 EBITDA expected to be higher than company's expectations
- Confirmation of the 2020 objectives: €200 million revenue and 10% EBITDA margin

Strasbourg (France), February 28, 2019 at 06:45pm - 2CRSI, manufacturer of very high-performance servers, today announced its consolidated revenue for the year ended 31 December 2018.

**Alain Wilmouth, Co-Founder and Chairman and CEO of 2CRSI said:** *"I am very proud of the many commercial successes achieved thanks to our products, in particular the Octopus, which have enabled us to more than double our sales. We have also been able to generate this strong growth while paying particular attention to our margins. However, the end of the year was marked by component delivery delays and invoicing delays in 2019. The beginning of the year is very dynamic, giving us good visibility on embedded growth and allowing us to confirm our 2020 objectives".*

At 31<sup>st</sup> December 2018, 2CRSI's revenue amounted to €65 million (non-audited), a strong increase (+112%) compared to 31 December 2017.

The volume of international deliveries is increasing sharply and now represents 56% of sales compared to 29% in 2017.

In a context of restrictive supplies of electronic components, the Group has chosen to focus on its historical customers and to increase its margin level in order to anticipate an EBITDA higher than the 2018 expectations.

On the back of the positive orientation of the activity, 2CRSI confirms its 2020 business plan with the objective of achieving a turnover of €200 million and an EBITDA margin of at least 10% by this time.

**Next financial publication: Tuesday 26 March 2019 (after market close)**
