## 2CRSi awarded new contract by EdgeMode

### EdgeMode significantly increases mining and HPC capacity through additional green high-performance servers

---

Strasbourg (France) and Chicago (Illinois, USA), 14 December 2021 - 2CRSi (EPA: 2CRSi, ISIN code: FR0013341781), a designer and manufacturer of high-performance energy-efficient IT servers, and EdgeMode Inc., a cryptocurrency mining and High-Performance Computing (HPC) technology company, announced a new order for additional green high-performance capacity to support EdgeMode's rapid growth and scale objectives.

Aiming to deliver best-in-class crypto mining and HPC cloud infrastructure, EdgeMode initially selected 2CRSi's solutions in February 2021, a collaboration that had since been extended with follow-up orders in March<sup>1</sup> and in July.

Following impressive quarterly growth that exceeded forecast and series of investment, EdgeMode has placed another order of \$1.5 million for additional energy-efficient OCtoPus servers, bringing orders to a total amount over \$4 million and confirming 2CRSi as a preferred tech partner.

The new equipment, set for delivery in the next few weeks, before the end of the current fiscal year (Feb 28, 2022), will make EdgeMode a top customer of 2CRSi.

EdgeMode founder and CEO Charlie Faulkner said: *"The high-performance compute capacity that 2CRSi deployed for us has enabled our strong growth over the year. Developing a world-class HPC infrastructure is one of many critical steps to EdgeMode's growth strategy to become listed on the OTCQB market by January 2022 before uplisting to Nasdaq within 12 months."*

*"We are delighted to see such strong development in our partnership with EdgeMode and we are committed to keep supporting their growth in the future. Together, we demonstrate that activities such as HPC and mining can be performed in a sustainable way."* added 2CRSi co-founder and Chairman Alain Wilmouth.
